The last few years have been controversial when it comes to the role women play and how they are represented and perceived in modern Australia: *speeches on misogyny in Parliament, the downfall of our first female Prime Minister* – It can't have always been like this - or can it? ***The Women who made Australia*** explores the stories of ten women who have made a significant impact on the development of modern Australia.

From our first woman in federal cabinet – **Dame Enid Lyons** to our first female Prime Minister – **Julia Gillard**.
